

## Chapter 1

### Introduction

#### 1.1 Host Institution Description

The Indonesia International Institute for Life Sciences (i3L) is a prestigious institution for higher education and research in the field of life sciences, situated in Jakarta, Indonesia. Currently, i3L provides a selection of ten undergraduate programs. The School of Life Sciences at i3L provides undergraduate programs in the fields of Biomedicine, Biotechnology, Food Science and Nutrition, Food Technology, and Pharmacy. The i3L School of Business provides an undergraduate program in International Business Management.

The vision of i3L is to establish itself as a prominent and internationally connected multidisciplinary institution that influences society via scientific advancements and innovative practices.

i3L endeavors to harness domestic resources to expedite Indonesia's competitiveness on the global stage, with the aim of achieving its vision. i3L prioritizes the cultivation of a distinctive, multidisciplinary, and integrative learning atmosphere to foster the development of future leaders and entrepreneurial scientists. This is achieved through the employment of highly qualified professors, utilization of cutting-edge facilities, and establishment of worldwide partnerships with academic institutions, corporations, communities, and governments.
